Dear colleagues,

The Center for Acoustic Research of the LMFA (Fluid Mechanics and Acoustics Laboratory, UMR CNRS 5509) invites applications for a full-time Professor position. The laboratory wishes to strengthen its activities in aeroacoustics, in one of the research topics developed within the Center for Acoustic Research (<http://acoustique.ec-lyon.fr>).

Candidates with a background in the numerical simulation of compressible turbulent flows or in the modelling of acoustic radiation from turbomachinery are especially welcome, but the application of highly qualified researchers with different profiles is also encouraged. The successful candidate must have a PhD and have demonstrated his/her ability to conduct high-quality research. He/she is expected to lead high-level research projects in aeroacoustics.

See the pdf file for the official french form and contacts

Application must be submitted from February to March 2019 (will be known in January)

Contact: christophe.bailly@ec-lyon.fr
